

# Moustachir Com

## Digital Product Service Offer

## What We Do

**Moustachir - DDD** is the technology division of "MST Moustachir", delivering web-to-and-digital product services to businesses across Algeria. We design, build, and operate high-quality web platforms and mobile applications. — From fast-launch landing pages to complex enterprise systems.

We work things together: product engineering, UI/UX design, cloud infrastructure, product launch support under one roof. Strong projects with us prosper with dedicated technical partners, not just a vendor.

## What sets us apart:

**Turnkey delivery** — from discovery to production deployment

**Local market expertise** with international engineering standards

**Transparent, fixed-price packages** — no surprise invoices

**Continuous support after go-live** with 24/7 on-call maintenance and alerts

**Proven track record** on healthcare, e-commerce, logistics, and fintech platforms

## How Our Pricing Works

All packages follow a three-tier model designed to match where your business is today and where you plan to go.

| Tier       | Target                                    | Key Features/Features                            |
|------------|-------------------------------------------|--------------------------------------------------|
| Start      | Individuals, small businesses, startups   | Essential features requested                     |
| Pro        | Growing SMEs, medium-sized businesses     | Advanced features, enhanced support, analytics   |
| Enterprise | Enterprise companies, large organizations | Customized features, full 24/7 dedicated support |

All prices are one-time development fees unless otherwise noted.  
Hosting and domain fees are annual recurring and billed separately.

## Part IV Hosting Services

Managed, secure, and optimised hosting infrastructure so you focus on your business, not handle the servers.

**All hosting plans include:**

-  SSL certificate (HTTPS) free
-  Daily automated backups
-  99.9% uptime SLA
-  24/7 protection
-  24/7 server monitoring
-  Full technical support during business hours

| Features             | Basic Hosting                | Professional Hosting  | Enterprise Hosting                        |
|----------------------|------------------------------|-----------------------|-------------------------------------------|
| Type                 | Shared Hosting               | Managed Shared VPS    | Custom VPS/Dedicated VPS                  |
| Storage              | 10GB – 100GB                 | 100GB – 1000GB        | 1000GB+                                   |
| Bandwidth            | Unlimited                    | Unlimited             | High-Speed / Variable                     |
| Uptime               | 99                           | 99.9                  | 99.999 / 99.9999                          |
| SSL Certificates     | Yes                          | Yes                   | Yes (Custom)                              |
| Site Builders        | ✓                            | ✓                     | ✓                                         |
| Backup Service       | ✓                            | ✓                     | ✓                                         |
| Server Monitoring    | ✓                            | ✓                     | ✓                                         |
| 24/7 Support         | ✗                            | ✓                     | ✓                                         |
| Scaling Resources    | ✗                            | ✓                     | ✓                                         |
| Data Center          | ✗                            | ✗                     | Global / Multiple                         |
| Customization        | ✗                            | Optimized             | Optimized                                 |
| Custom Server Config | ✗                            | ✓                     | ✓                                         |
| Support              | Basic / Email                | Priority              | Priority / Dedicated                      |
| Best For             | Small websites / Simple apps | Medium to large sites | Large traffic / Custom business solutions |
| Availability         | 24/7 – Limited days          | 24/7 – Limited days   | 24/7 – Full support / On-demand           |

Basic configuration is generally 1 GB RAM – 1 GB SSD storage, and is suited for top offering when you start testing others in the marketplace.

Basic web hosting applications are managed shared vps mostly, which means server hosting features are not as good as dedicated vps. Other configurations are found from all other deployment to achieve the best high-performance vps hosting plans around the internet as well as directly support the private cloud.

## Part V

# Maintenance & Support Plans

Your product is hot, now keep it that way. Our maintenance plans ensure your platform stays secure, fast, and up to date long after launch.

All maintenance plans include a free 15-day warranty immediately after delivery.

|                                     | Basic Monthly     | Professional Plan  | Enterprise Plan                           |

## Part VI

# Auditing & Consulting

Find out what's wrong with your existing platform faster & second opinion before your team build! We've got you.

### Q1 Technical Audit

is thorough independent assessment of your current digital product — code quality, performance, security, etc.

| Initiative                                         | Client Audit | Technical Audit | Enterprise Audit |
|----------------------------------------------------|--------------|-----------------|------------------|
| Performance analysis (page-level, core test suite) | ✓            | ✓               | ✓                |
| Security vulnerability scan (OWASP Top10)          | ✓            | ✓               | ✓                |
| UX research phase                                  | ✓            | ✓               | ✓                |
| UI/UX accessibility review                         | ✗            | ✓               | ✓                |
| Code quality & architecture review                 | ✗            | ✓               | ✓                |
| Website design & performance analysis              | ✗            | ✓               | ✓                |
| Existing architecture assessment                   | ✗            | ✗               | ✓                |
| Customer satisfaction survey (NPS, CSAT)           | ✗            | ✗               | ✓                |
| Content strategy content review                    | ✗            | ✓               | ✓                |
| Marketing conversion tracking                      | ✗            | ✗               | ✓                |
| Total                                              | 10/1000/100  | 10/1000/100     | 100/1000/100     |

## 2.2 Technical Consulting

Strategic guidance for businesses making key technology decisions: cloud selection, architecture design, vendor evaluation, and digital transformation roadmaps.

| Service                                        | Starts         | Ends           | Eligibility    |
|------------------------------------------------|----------------|----------------|----------------|
| Technology assessment                          | ✓              | ✓              | ✓              |
| Project mapping & estimation services          | ✓              | ✓              | ✓              |
| Cloud consulting services (MSP)                | ✓              | ✓              | ✓              |

| Price                                          | \$0.0000 - \$4 | \$0.0000 - \$4 | \$0.0000 - \$4 |

### ↳ Business Consulting

For sub-projects starting at 10k MMR, for middle, full-scale projects starting at 20k MMR.

## Part VII Custom Solutions

Your business logic and core products cannot be forced into a pre-organized structure.

Custom solutions are our premium, fully tailored engagements, designed for clients with complex, novel or large-scale requirements. Every custom project is architected from scratch for your exact business logic, integrations, and scale targets.

### Custom engagements include:

- ✓ Customized product discovery & mapping workshop
- ✓ Custom UML research & information architecture
- ✓ Bespoke technical architecture designed for your use case
- ✓ Full development lifecycle (design → build → test → deploy → maintain)
- ✓ Documentation, source code ownership, and deployment runbooks
- ✓ 24/7 deployed launch warranty and priority support

| Type                             | Starting price | Minimum commitment       |
|----------------------------------|----------------|--------------------------|
| Custom static platforms          | \$10,000+      | 20 days – 60 days (avg)  |
| Custom dynamic applications      | \$20,000+      | 30 days – 90 days (avg)  |
| Custom full-stack (web + mobile) | \$30,000+      | 40 days – 100 days (avg) |

Exact pricing is scoped after a free discovery session. Final quotes are based on feature complexity, integrations, and timelines.

## Why Work With Moustachir COM

|                       | What we deliver                                                                          |
|-----------------------|------------------------------------------------------------------------------------------|
| Timeliness            | Deliver on time and meet upcoming deadlines to your delivery                             |
| Transparency          | Share your work with what we give to what you pay                                        |
| Quality               | Deliver on products with better knowledge, strong productivity, and deployment practices |
| Security              | Secure, complete development practices, risk in deployment, and governance               |
| Knowledge             | Support customer needs with projects, with knowledge, and experience                     |
| Long-term partnership | Moustachir Support After the initial customer onboarding and provide ongoing maintenance |

## Custom engagements include:

1. Schedule a free discovery call 30 minutes understand your project
2. Review tailored proposal scope, price, and ready within 48 hours
3. Sign off on a full engagement start to your project immediately
4. Iterative delivery weekly check-ins and team milestones throughout
5. Access to feedback, deployment, documentation, and team meetings if needed
